Number and Percentage of People Without Health Insurance Coverage by State Using 2- and 3-Year Averages: 2008-2009 and 2010-2011

(Numbers in thousands. People as of March of the following year. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see www.census.gov/apsd/techdoc/cps/cpsmar12.pdf)

States	3-year average (2009-2011)					2-year average percentage uninsured				
	Total	Uninsured				2008-2009		2010[2]-2011		Change (2010-2011 average less 2008-2009 average)[3]
		Number	90-percent confidence interval[1](±)	Percentage	90-percent confidence interval[1](±)	Percentage	90-percent confidence interval[1](±)	Percentage	90-percent confidence interval[1](±)

Wyoming	552	93	6	16.8	1.1	14.3	1.5	17.5	1.3	*3.2

* Statistically different from zero at the 90-percent confidence level.

- Represents or rounds to zero.

[1]A 90-percent confidence interval is a measure of an estimate's variability. The larger the confidence interval in relation to the size of the estimate, the less reliable the estimate. Confidence intervals shown in this table are based on standard errors calculated using replicate weights instead of the generalized variance function used in the past. For more information see "Standard errors and their use" at <www.census.gov/hhes/www/p60_243sa.pdf>.

[2] Consistent with 2011 data through implementation of Census 2010-based population controls.

[3]Details may not sum to totals because of rounding.
